

## SENIOR PROJECT MANAGER

### The company:

Our client is a multi-specialized construction group with more than one thousand employees.

The growth model is based on 3 pillars:

- Diversification
- Innovation
- Export

We do not innovate only in one specialty, but more as a total business in several disciplines : water , energy, mobility , restoration, engineering, special techniques and other specialized techniques. Our client is a popular partner for the most complex projects and infrastructure works.

With exceptional technological know-how and an impressive fleet of machines, currently our client builds pipelines in several European Countries, such as; Germany, Czech Republic, Italy, Belgium, the Netherlands, ... We would like to reinforce our teams with an Experienced Senior Project Manager, with a high affinity or experience in the construction of gas pipelines.

### Your challenges:

You are responsible for the overall project management of the construction of gas pipelines:

- You manage the projects from A till Z; you know how to deal with the technics, safety, the quality and the budget aspects of our projects.
  - The management of contract documents concerning legal, financial, safety, technical and quality requirements are part of your job. You check whether the necessary permits are available and correct.
  - You manage the budget, the project results and the financial reports and the profitability of the contract.
  - As a Project Manager you will lead together with the Construction Manager a team of operational staff and/or subcontractors. You will make sure that the right man is on the right position for each work.
  - You are able to visualize and manage all risks and you will manage and solve the popped up problems.
  - As an expert in your field you manage during the execution the technical and complex aspects of the project and you share your knowledge with your team.
  - You are the first person our customer will contact.
  - You build up intense cooperative relationships with the team members of our partner on site.
  - As a project manager you will make sure that everything, that happens on the site, is done in accordance with both the polish construction laws and the safety, health, quality & environment policies.
-

Your profile:

- You obtained a Master of Civil Engineering, University level.
- You have at least 10 years of relevant experience preferably in the field of construction of pipelines.
- You are very good in organizing things and you have strong communication skills.
- You are a team player and can people from different nationalities let work efficiently together.
- You are pro-active, forward looking and you are able to judge a situation correctly.
- You speak fluently English, knowledge of German is very important, knowledge of other languages is nice to have.
- Willing to work abroad.

Our client offers:

- A challenging job as Senior Project Manager in a fast growing company with opportunities abroad.
- The opportunity to work on big and complex projects
- A salary package that rewards your performance and experience.
